It's Not A Home Until It's Planted

TO FRIENDS AND CUSTOMERS

I wish to thank our many old and new customers for the fine business you have given us last year. Many people have found it a little difficult to find our new location in Rapid City at 509 West Blvd. No. No doubt many of you old customers will still drive down Rapid Valley, where we were located for twenty-five years. I am now going on my 27th year in the Nursery business, and expect one of our best seasons. Unfortunately last year we ran short of upright junipers. This year we have ordered an ample supply, including four varieties, as you note in this list. Also two sizes of Savins and Pfitzer Juniper. We have a good supply of Black Hills spruce on hand, the State Tree of So. Dak.

DELIVERY

Early orders will be given first consideration on large or select stock, which will be labeled or set aside. Free delivery on early orders by truck, if within a radius of 100 miles of Rapid City, at the proper time. Where orders have to be shipped, they will go C.O.D., unless cash has been paid in advance and then stock will be prepaid, except on balled or burlapped stock, which will be shipped collect.

GUARANTEE

We are still going to continue our usual guarantee on nursery stock, with replacement for one year at one-half price. However, when customers order amounts to \$10.00 or more a ten percent discount will be allowed where cash is paid in full at the time stock is purchased or when order is sent in. Complete instructions given with each order on planting and care of stock purchased.

PLANTING

We will do a certain amount of planting, where purchaser lives within or around Rapid City. Planting will cost one-fourth price you pay for stock unless otherwise indicated under prices. No planting job less than \$1.00. Planting hedges cost 15 to 20 cents per plant depending on the soil; top dirt or fertilizer additional. Lawn work will not be started until after the first of May. This is the right time to start lawns as the grass comes up quickly and you will avoid many weeds.

E. A. GATES

SHADE TREES

For seedlings look under HEDGING AND WIND-BREAKS.

The following trees have proved to be dependable, hardy varieties to choose from. We will be glad to advise if you are undecided as to what would be suitable for your needs.

AMERICAN ELM--A hardy native tree. Very suitable for shade and parkways.
